Antique Ice Cream Scoop
Part number 996661

Product care:

- This Ice Cream Scoop will last you for years and years. We highly recommend that you hand wash it only. The dishwasher will ruin the shiny finish and turn it a dull gray color.
- Be careful of the front sharp edge which allows you to cut through the hardest of ice creams. If you run the blade portion of the scoop over hot water it will cut even better.
- This Antique Ice Cream Scoop works well for serving other foods. We recommend that you use it with room temperature or colder foods. When you do use it with hot foods, be careful, because the scoop can get very hot.

We think you will find this Ice Cream Scoop to be the best one you have ever owned. Please tell your family and friends to visit our website at www.carr.com to get their own scoop!
